DIGITAL DESIGN GRAPHICS TECHNOLOGY
Autodesk Authorized Training Center

Are you creative and like working with computers? Would you like to learn to create two- and three-dimensional graphics? Why not work doing something you enjoy?

Napa Valley College's DDGT program is a comprehensive, four-semester program. Upon completion, a student is employable as an entry-level design drafter and three- dimensional (3D) artist, with the versatility to work in a wide range of drafting and 3D graphics fields.

Coursework includes the latest release of the Autodesk AutoCAD drafting program, Inventor Professional (3D Mechanical Design), 3ds Max Design (animation), Adobe Photoshop (image editing), Dreamweaver (website design), Premiere and After Effects (video editing and compositing).

Get certified in the program of your interest in four weeks or less at the Autodesk Authorized Training Center (ATC)!

Courses that are offered change every semester and can include: AutoCAD Fundamentals, AutoCAD Advanced, Revit Architecture Fundamentals, Inventor Intro to Solid Modeling, Inventor Advanced Part Modeling, 3ds Max Design Fundamentals, Civil 3D Fundamentals, and more!

To see our current class schedule, please visit our department website at www.ddgt.net

Certificate classes cost $341.00 each, are 32 hours, and use the latest release of the Autodesk software.

The DDGT program lab is also an Autodesk Authorized Training Center, which ensures that students are always taught on the most current releases of the various Autodesk software programs used in their coursework.

As a graduate in digital design and graphics, you'll be ready to start your career in mechanical or architectural drafting and design or technical illustration using 3D rendering programs. Upon successful completion of the DDGT degree, students will receive five Autodesk software certifications.
