## DDGT240 Gunsmoke Video Assignment

You will use the Adobe Premiere software to create your own unique video based on the Gunsmoke western television show. You will be supplied the raw uncut footage of a Gunsmoke episode located in the Exercise folder. There are multiple cuts from different camera angles and positions (including close ups and wide shots) and the sequences are not in order. You will cut and edit the video to create your own unique take on the video creating your “vision” of the story.

The final video will include the following:

- Opening Titles
- Your Logo
- Additional audio clips are required. You will specifically need to add sound effects for the fighting sequences (punches, etc). You can download free audio clips online or create your own!
- Audio soundtrack (music clips) is optional but could greatly enhance the video if the right music track(s) is selected.
- You can add additional video sources to this project if you wish as appropriate but is not required.
- Closing Titles including your contact info.
- This is supposed to be a fun project. Your choice of special effects (speeding time up, slowing time up, playing a shot backwards, repetition of the same scene for an artistic effect, etc.) are all encouraged.
- Again, have fun but please keep this respectable. Please make sure that I could show this to **anyone** and not be embarrassed.
- Final video must be submitted to the “Handins” folder for credit.
