DDGT121 – Website Button

You will create a “website button” that will be placed on our department website on the following page: http://ddgt.net/student_pages.html

The button will be turned into a link that will take users to your portfolio website (by me).

The “Working File PSD” should be 300px by 80px in RGB format with a resolution of 200ppi. We will create this file together in class. When the file is completed, you will “Save out for Web” as a JPG at 50% size resulting in a final file at 150px by 40px at 72ppi.

You can refer to the other buttons on our “Student Pages” page for ideas on your logo.

Your logo must include your name or company name and some or all of your logo. Text must be readable.
